Professional Summary

Lead Automation QA Engineer with 20+ years of experience in software testing, including 11 years in automation. Skilled in designing and maintaining automation frameworks for web and API testing using Java and TypeScript. Proven leadership in QA team building, mentoring, and implementing CI/CD pipelines. Experienced across fintech, banking, and healthcare domains.

Core Skills & Technologies

Programming & Scripting: Java, TypeScript

Test Automation: Playwright, Selenium WebDriver, Gatling, Cucumber, TestNG, JUnit

API / Backend Testing: RestAssured, Postman, WireMock

CI/CD & Tools: Jenkins, Azure DevOps, GitHub Actions, JIRA, Bitbucket

Databases: MySQL, MariaDB, Oracle, MSSQL Server

Methodologies: Agile (SCRUM, Kanban), Waterfall

Key Projects

- Payment Engine - Tribe28 (2024-2025): Maintained and extended API automation for a core banking payment system using Java 21, RestAssured, Spring Boot, and Azure DevOps.
- Customer Onboarding Platform - Backbase (2019-2024): Developed full automation setup (framework, CI/CD, FE/BE tests) from scratch with Playwright and RestAssured, reducing regression cycle by 60%.
- Loan Calculator - DataArt (2016-2019): Built UI and API automation for financial applications using Selenide and Serenity BDD, improved release validation efficiency.

Professional Experience

Tribe28 (2024 - 2025), Amsterdam (NL), Lead QA Engineer

Responsibilities and Key Accomplishments:

- Maintain existing testing framework to support changes in the functional parts of Payment Engine (Java 21, RestAssured, Cucumber, WireMock, AzureDevOps)
- Triage the incoming issues and prioritize them and work as a stand-by person for production support

Backbase (2019 - 2024), Amsterdam (NL), Lead QA Automation Engineer

Responsibilities and key accomplishments:

- Setup process of testing from the scratch (testing framework and tests, execution pipeline, automate release procedure), act as QA Chapter Lead, aligning the Guild requirements and best practice, test planning, test strategy developments and execution
- BE/FE automation tests creation (RestAssured / Playwright, Jenkins, GHA)

Dataart (2016 – 2019), Wroclaw (PL), Senior QA Automation Engineer

Responsibilities and key accomplishments

- UI /BE automation tests creation and framework maintenance (Cucumber, Selenide, RestAssured)
- Test analysis, test planning
- Integration testing between internal and external teams
- Team coordination, team mentoring

More information about projects and technologies you can find here: <https://gentle-journey-86001.herokuapp.com/cv>

Training & Tutoring Experience

Provided internal and external QA training programs (8 years) focused on both Manual and Automation testing. Covered Selenium WebDriver, REST Assured, TestNG, and practical test design principles for aspiring testers and teams.

Education

National Technical University 'Kharkiv Polytechnic Institute' - Specialist Degree in Automatic Device Building (1999-2005)

Languages

English - Upper Intermediate | Ukrainian - Native | Polish - Advanced
